Forecast for Wednesday 26 Jul 2023

Weather: Generally cloudy with rain, occasionally heavy and prolonged overnight into Wednesday. The rain will clear east shortly dawn, the cloud breaking up to give sunny spells and a few showers. Sunshine becoming predominant for a time in the afternoon before thicker cloud and prolonged rain arrive from the west during the evening.

Chance of cloud-free hill tops above 600m: 20-30% becoming 90% or more. Down to 40% in the evening.

Low Cloud and visibility: Poor visibility at height initially with areas of low cloud as low as 300m in the northwest of the Park, more like 400-500m elsewhere. The cloud will slowly lift above summits during the morning. Very good visibility all around otherwise but becoming mediocre in the evening, with cloud base gradually lowering down to 400m from the west.

Meteorologist's View

Another cool day on the summits, especially under lingering cloud.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 25 Jul 2023	0mm	11.6mm	55.6mm

Forecast for Thursday 27 Jul 2023

Weather: Murky with extensive low cloud and outbreaks of light rain and drizzle in the morning, this slowly brightening up during the afternoon to allow a few timid sunny spells at the end of the day.

Maximum wind: West to south-westerly winds 17mph with gusts 25-29mph.

Chance of cloud-free hill tops above 600m: 10% becoming 85% or more.

Low Cloud and visibility: Poor at height initially, with cloud as low as 300m. Slowly improving through the day, the cloud eventually rising above summits after lunchtime although there's a chance for patches of low cloud to persist in the west. Generally good below cloud.

Temperature: **Valleys:** Plus 17 Celsius.
At 600m: Plus 13 Celsius.
Freezing level: Well above summits.
